📇 Professional Summary

Software Engineer specializing in CRM/CMS integrations, API-driven automation, and data synchronization across enterprise platforms. Experienced in building career portals, backend services, and workflow integrations using Java, Spring Boot, and MySQL. Focused on reliability, scalability, and delivering solutions aligned with business needs in Agile environments.

🧠 Technical Skills

- cms
- core java
- spring boot
- bootstrap
- Git/Git hub

- crm
- MySQL
- spring data jpa
- javascript
- Maven

- Integrations
- JDBC
- Html
- Rest APIs
- Agile/scrum

- Service Hub
- Hibernate
- css
- API integrations
- Unit testing

💼 Work Experience

Software Engineer — Techlinx IT Services   05/2024 – present | Hyderabad, India

Worked on CRM/CMS integrations and career portals, focusing on API development, automation workflows, and data synchronization across systems.

- Developed and maintained a CMS-based Career Portal, improving hiring workflow efficiency and content management.
- Built secure API integrations to automatically import job listings from external ATS platforms into CRM, enabling real-time updates.
- Designed automated workflows using Service Hub and Flow Studio to synchronize candidate and job records across systems.
- Developed backend integration services using Java and Spring Boot to connect CRM, CMS, and third-party platforms.
- Implemented validation and migration logic to prevent duplicate records and ensure data accuracy.
- Investigated and resolved integration issues, reducing manual intervention and support needs.
- Collaborated with Agile teams to plan releases, review code, and deploy features across environments.

📂 Projects

Career Portal Integration — Techlinx (Clients: Clemens Food Group, ATSG Inc & Miter Brands), *Techlinx IT services.* ⬈   09/2024 – Present

- Developed and maintained a CMS-based career portal used across multiple client implementations.
- Built API integrations to pull job data from external ATS systems into CRM, ensuring real-time job synchronization.
- Designed automated workflows in Service Hub and Flow Studio to sync candidate and job records between systems.
- Implemented validation and monitoring to prevent duplicate entries and improve data accuracy.

- Collaborated with cross-functional teams to deploy enhancements across multiple environments and clients.

Basic To-do list for Students ⊠   03/2025 – 05/2025

- Designed backend logic with Java & Spring Boot, configuring MySQL connections and deploying locally via Maven/Tomcat.
- Built reusable UI components for forms and lists, ensuring smooth interaction with backend APIs.
- Performed end-to-end testing across APIs and UI to validate functionality and reliability.

Loan Management System, *Slokam Technologies* ⊠   10/2023 – 01/2024

- Designed loan eligibility/approval logic with Core Java & Spring Boot, developing REST APIs for customers, assets, and loan records.
- Leveraged Spring Data JPA with MySQL and applied debugging techniques to quickly resolve functional issues.
- Collaborated using Git and team reviews to implement reliable, optimized solutions.

Basic E-commerce website, *Slokam Technologies* ⊠   02/2024 – 04/2024

- Built a responsive, mobile-friendly UI using HTML5, CSS3, and JavaScript, covering product listings, search, cart, and checkout flows.
- Optimized performance and navigation to improve user experience across devices and screen sizes.
- Deployed the project on GitHub Pages for easy access, collaboration, and visibility.

🎓 Education

PBR VISVODAYA INSTITUTEOF TECHNOLOGY ANDSCIENCE,   08/2019 – 06/2023 | Nellore, India
Bachelor of Engineering, Major in Electronics and Communication Engineering
cgpa : 7.12
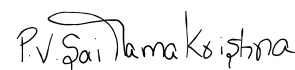

📑 Certificates

- Phenom Certified CMS — Content Management System (CMS)

- Phenom Certified Recruiter — Candidate Relationship Management (CRM)

- I completed on training on Java backend development course in slokam technologies at Hyderabad.
